

Techno pack

Company Profiles

Started functioning with an objective of providing packaging materials, Techno Pack has set the benchmark of quality in this sphere of business. The Bangalore based company is well known distributor, wholesaler and promoter of excellent packaging material that comprises of EP foam, air bubble film, stretch wrap film, tarpaulin, adhesive tapes, and many more. Since the establishment, our business acumen and customer centric approach has led us to the acme in this field.

Quality Assurance

Main motto of the company is to distribute, wholesale and promote durable and high quality packaging materials in the market. Our quality experts check these products to meet international quality standards before delivery. These products are adequate to provide you complete satisfaction in terms of durability, elegant look and superior quality, which is the main reason behind our success in this business.

Our Mission

To achieve entire trust of customers by fulfilling their all expectation and requirements. Our aspiration of growth encourages us to keep us update with market trends and international quality standards. Hence, we have been striving to offer perfect items to customers after in-depth study on the market and specific customer needs.

Why With Us?

- Professional Management: We are experienced and highly Qualified promoters. We believe in delivering and wholesaling best quality customized products as per customers' specifications.
- Comprehensive Sourcing Solutions: Marketing tie-ups with leading ISO certified manufacturers of packaging machines in India.
- Customer Oriented Approach: We believe in developing long-term relationship with customers by offering them and unmatched quality packaging products.
- Industrial Acumen: We have industrial acumen, which enable us to deliver customized services to cater to customers' entire expectations.

Products

- AIR BUBBLE
- EPE FOAM
- XLPE FOM
- STRETCH FILM
- CORRUGATED ROLLS
- PVC SHINK FILM
- BACKER RODS
- EPE TUBES & RODS
- ADHESIVE TAPES
- TARPULINS
- PUF SHEETS
- INDUSTRIAL ADHESIVES
- THERMOCOLE (EPS)
- SPECIAL PAPERS
- CUSTOMIZED PACKAGING
- STRAPING ROLLS

Air Bubble Film

We are the Distributors of supreme air bubble film roll and bags that are fabricated in our factory in conformator to international standards. These are widely used for packaging purposes and are tailored as per the client requirements. Our exclusive range has two layers of low-density polyethylene (LDPE) sheets that offer cushioning by entrapping air in between. These rolls are in high demand in the cosmetic market and provide optimum protection of the packaged components from dents and scratching in transit and movements.

Specification

- Width: 1.1meter / 1.1meter / 2.1meter in gsm ranging from 40gsm - 210 Gauge to 140 GSM - 310 Gauge
- standard length: 110meters
- Air Bubble Patch / bag / cut pieces
- Air Bubble box type bags
- Also specially laminated grade with aluminium foil / EPR foam / LDPE film

EPE Foam

Techno Plast is happy to provide packaging solutions for your products. We design and manufacture custom packaging solution for you.

Our Experience & resource full staff consider your ideas from start design stage to final production.

Our EPE insulation foam is used by a large number of industries like automobiles, construction, insulation, marine, sports & many more. These are available in numerous tiny closed cells, which have very fine and uniform structure ranging from 1 to 2 mm extruded thickness very unique heat lamination process is used to bulk up the thickness of 5 mm to 100mm. Besides many more versatile in standard form of roll and sheet adhesive backed blocks, die cut components, pouches cut piece, fabricated 3-D covers, laminated rolls with aluminium kraft paper bubble sheet HDPE sleeves

We also offer customized pouches in various sizes for industrial and other packaging, and static pouches for electronic equipment is also available. We do small orders too.

XLPE/ Eva Foam

Cross Linked XLPE Sheets & Film Sheets. It Has Excellent Technical Properties. It Is Extremely Resilient And High Load Baring Capacity. It Has Good Dimensional Stability.

Cross Link XLPE Available In 4 Large Number Of Grades With Varying Density Sheet Hardness & Other Technical Properties. Sheet Size is Available In Various Thickness Ranging From 1mm To 100mm Different Colors Standard Size Of The Sheet Is 1000 X 2000mm.

Silica Gels

We Sell different formulations of Silica Gel that are extensively used as desiccant and adsorbent in different industrial and consumer applications. These can also be modified to suit different process conditions and varying humidity operation requirements. The color of Silica gel changes from blue, orange, yellow to different colors or being exhausted.

Thermocole / EPS

EPS (Expandable Polystyrene) is a petroleum by-product and is a polystyrene variation of styrene monomer after polymerization, allowing agent called porogene is added to make Expandable EPS comes in various based sizes and is spherical and almost transparent with approx density of 750 kg/m³. EPS is available in two grades namely

- Normal Grade
- Self Extinguishing Grade (Fire Retardant Grade)

EPS AND PACKAGING MATERIAL

EPS is widely used as a packing material as it is a very good shock absorbent and is very cheap, and hence is almost irreplaceable. Its application field is very wide and is used as a packaging material in home appliances and other items.

EPS PACKAGING : EPS Loose Fills, EPS Balls, EPS Insulation Sheets, EPS Blocks, EPS Pallets/Thermocole Pallets, EPS Pipe Section / Thermocole Pipe Section, EPS Sandwich panels

Stretch Film

We offered performance, machine and manual grade stretch film provide both high strength and high stretch. our Stretch Films are 3 Layer and 5 Layer Films. enables more packs/ loads per roll to be wrapped, using less film, resulting in the lowest cost per load. with high performance film, the more it is stretched, the more the film recovers to hold prevent product damage.

Unique Features

- Accurate cross-mixed adhesiveness
- Grants internal molecular strength and stability
- Does not allow any molecular degradation during a successful operation
- makes the adhesive to last longer.
- The castable base film makes it split resistant along the carbon center seam

Bopp Tapes

Self adhesive BOPP Tapes are available in many sizes and colours to meet the Customer needs. printed tapes are also available on demand.

Biasly Oriented polypropylene (BOPP) Film coated with acrylic based adhesive in different micron grams coating thickness. The BOPP tape is available in different Colours. BOPP tape is used in carton box sealing and for stationary purposes. printing Of single and multiple colours is a possible with logo or customized design.

Strapping Rolls

Polypropylene tensional strapping is safe & secure method of sealing your boxes & pallets. machine & manual strapping rolls available in different sizes
